

FINVISORY

Regulatory Problems & Business Impact Dataset

Consolidated analysis of Wealthtech, Insurtech, Payments, Fintech SaaS, Crypto/VDA, Credit/Lending, PPI/Wallets and Payment Aggregators

80 company-level entries • Source-derived • Compliance impact focused

Dataset	Companies
Previously merged six-sector workbook	60
PPI / Wallet + Payment Aggregators workbook	20
Total consolidated dataset	80

The source documents distinguish regulatory/compliance impact from actual enforcement or violation. This consolidated PDF preserves that distinction and retains the activity-dependent regulatory role described in the source material.

Name	Problem faced	Entity	Doc
Zerodha	Role: Stock broker / investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
Groww	Role: Stock broker / investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
Upstox	Role: Stock broker / investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
Angel One	Role: Stock broker / investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
5paisa	Role: Stock broker / investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
Dhan (Moneylicious Securities)	Role: Stock broker / investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
INDmoney	Role: Investment platform / registered intermediary ecosystem. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf

Name	Problem faced	Entity	Doc
ET Money	Role: Mutual fund / investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
Upstox-backed Wealth / investment ecosystem	Role: Digital investment platform. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
Smallcase	Role: Investment platform / SEBI intermediary ecosystem. Potential impact depends on the activity actually performed: stock-broking, investment advice, research, mutual-fund execution/distribution or another SEBI-regulated role. Applicable requirements may require changes to onboarding/KYC, order execution and risk checks, registration/disclosures for regulated advice or research, direct-plan mutual-fund execution, investor grievance handling, cybersecurity/API controls, records, and product suitability/disclosures. The source explicitly cautions that these are regulatory/operational impacts, not claims of violations.	SEBI	Wealthtech_Investment_Platforms_Regulation_Problems_Dataset.pdf
ACKO	Role: Digital general insurer. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
Go Digit	Role: Digital general insurer. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
PB Fintech / Policybazaar	Role: Insurance distribution platform / broker ecosystem. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
InsuranceDekho	Role: Insurance distribution / broker ecosystem. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf

Name	Problem faced	Entity	Doc
Turtlemint	Role: Insurance distribution / intermediary ecosystem. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
RenewBuy	Role: Insurance distribution / intermediary ecosystem. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
Ditto Insurance	Role: Insurance distribution / broker ecosystem. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
Plum	Role: Digital insurance distribution / corporate benefits. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
Onsurity	Role: Digital insurance / health-insurance platform. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
Riskcovry	Role: Insurance technology / distribution infrastructure. Potential impact depends on the entity's exact licensed role. Regulatory changes can require updates to product approval/governance, digital sales and consent capture, policy documents, claims and servicing journeys, grievance handling, advertising/disclosures, commissions and distribution workflows, Bima Sugam integrations, electronic-policy/data exchange, sandbox reporting and consumer-protection controls, and cybersecurity/vendor controls. A technology provider is not automatically an insurance intermediary, and the source does not allege violations.	IRDAI	Insurtech_Regulation_Problems_Dataset.pdf
NPCI	Role: Retail payment system operator. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf

Name	Problem faced	Entity	Doc
PhonePe Private Limited	Role: UPI / BBPOU / payment participant. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
Google India Digital Services Pvt. Ltd. (Google Pay)	Role: UPI / payment participant. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
Amazon Pay (India) Pvt. Ltd.	Role: UPI / payment participant; PA-CB. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
WhatsApp Payments India Pvt. Ltd.	Role: UPI / TPAP. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
One97 Communications Ltd. (Paytm)	Role: UPI / payment ecosystem. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
MobiKwik Systems Ltd.	Role: UPI / BBPOU / payment ecosystem. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
BharatPe	Role: UPI / merchant-payment ecosystem. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf

Name	Problem faced	Entity	Doc
Juspay Technologies Pvt. Ltd.	Role: Payment technology / orchestration. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
Fino Payments Bank Ltd.	Role: Payments Bank / payment participant. Potential impact depends on the payment role and RBI authorisation. Requirements can create authorisation and system-access assessments, India-based payment-data storage and supervisory-access requirements, cybersecurity/resilience work, vendor and operational controls, failed-transaction TAT and customer-compensation workflows, offline-payment controls, KYC/AML changes, and additional authorisation/FEMA/monitoring/reporting requirements for PA-CB activity. The source cautions against treating every payment app or technology vendor as an RBI-authorised payment-system operator.	RBI	Payment_Companies_PSPs_Regulation_Problems_Dataset.pdf
Perfios	Role: Financial-data / lending SaaS. These firms are technology vendors, not automatically regulated financial entities. Their main regulatory burden often comes through banks/NBFCs and other regulated customers' outsourcing and third-party-risk obligations. This can require stronger vendor due diligence, contractual audit and RBI/regulatory-access clauses, cloud/data-location controls, cybersecurity, IAM, logging, vulnerability management, incident response, business continuity/DR, data confidentiality and deletion controls, API/integration changes, and support for compliant digital-lending/LSP workflows. The source does not state that every listed vendor is itself regulated.	RBI / regulated financial-institution customers	Fintech_SaaS_B2B_Infrastructure_Regulation_Problems_Dataset.pdf
Signzy	Role: KYC / onboarding SaaS. These firms are technology vendors, not automatically regulated financial entities. Their main regulatory burden often comes through banks/NBFCs and other regulated customers' outsourcing and third-party-risk obligations. This can require stronger vendor due diligence, contractual audit and RBI/regulatory-access clauses, cloud/data-location controls, cybersecurity, IAM, logging, vulnerability management, incident response, business continuity/DR, data confidentiality and deletion controls, API/integration changes, and support for compliant digital-lending/LSP workflows. The source does not state that every listed vendor is itself regulated.	RBI / regulated financial-institution customers	Fintech_SaaS_B2B_Infrastructure_Regulation_Problems_Dataset.pdf
M2P Fintech	Role: Card / banking infrastructure. These firms are technology vendors, not automatically regulated financial entities. Their main regulatory burden often comes through banks/NBFCs and other regulated customers' outsourcing and third-party-risk obligations. This can require stronger vendor due diligence, contractual audit and RBI/regulatory-access clauses, cloud/data-location controls, cybersecurity, IAM, logging, vulnerability management, incident response, business continuity/DR, data confidentiality and deletion controls, API/integration changes, and support for compliant digital-lending/LSP workflows. The source does not state that every listed vendor is itself regulated.	RBI / regulated financial-institution customers	Fintech_SaaS_B2B_Infrastructure_Regulation_Problems_Dataset.pdf
Decentro	Role: Banking / financial APIs. These firms are technology vendors, not automatically regulated financial entities. Their main regulatory burden often comes through banks/NBFCs and other regulated customers' outsourcing and third-party-risk obligations. This can require stronger vendor due diligence, contractual audit and RBI/regulatory-access clauses, cloud/data-location controls, cybersecurity, IAM, logging, vulnerability management, incident response, business continuity/DR, data confidentiality and deletion controls, API/integration changes, and support for compliant digital-lending/LSP workflows. The source does not state that every listed vendor is itself regulated.	RBI / regulated financial-institution customers	Fintech_SaaS_B2B_Infrastructure_Regulation_Problems_Dataset.pdf

Name	Problem faced	Entity	Doc
CoinDCX	Role: VDA exchange / service provider. For covered VDA activities, the current perimeter described by the source is primarily AML/CFT and tax rather than a general RBI/SEBI licence for private crypto assets. Covered Reporting Entities may need FIU-IND registration, designated compliance leadership, KYC/customer due diligence, beneficial-owner checks where applicable, transaction monitoring, suspicious-transaction reporting, record retention, blockchain/wallet screening, sanctions/risk controls, and audit trails. Tax workflows may need to handle 30% VDA tax under section 115BBH and TDS under section 194S. Offshore providers serving India can fall within the reporting framework when their activities are in scope. Security/custody/fraud controls remain important. FIU registration is not a general RBI/SEBI crypto-exchange licence.	FIU-IND / Income Tax Department / Government of India	Crypto_VDA_Platforms_Regulation_Problems_Data.pdf
CoinSwitch	Role: VDA exchange / service provider. For covered VDA activities, the current perimeter described by the source is primarily AML/CFT and tax rather than a general RBI/SEBI licence for private crypto assets. Covered Reporting Entities may need FIU-IND registration, designated compliance leadership, KYC/customer due diligence, beneficial-owner checks where applicable, transaction monitoring, suspicious-transaction reporting, record retention, blockchain/wallet screening, sanctions/risk controls, and audit trails. Tax workflows may need to handle 30% VDA tax under section 115BBH and TDS under section 194S. Offshore providers serving India can fall within the reporting framework when their activities are in scope. Security/custody/fraud controls remain important. FIU registration is not a general RBI/SEBI crypto-exchange licence.	FIU-IND / Income Tax Department / Government of India	Crypto_VDA_Platforms_Regulation_Problems_Data.pdf
WazirX	Role: VDA exchange / service provider. For covered VDA activities, the current perimeter described by the source is primarily AML/CFT and tax rather than a general RBI/SEBI licence for private crypto assets. Covered Reporting Entities may need FIU-IND registration, designated compliance leadership, KYC/customer due diligence, beneficial-owner checks where applicable, transaction monitoring, suspicious-transaction reporting, record retention, blockchain/wallet screening, sanctions/risk controls, and audit trails. Tax workflows may need to handle 30% VDA tax under section 115BBH and TDS under section 194S.
